DEHUMIDIFY with Comfort-Aire Dehumidifiers. Nothing can keep your home as dry as the desert, but Comfort-Aire Electric Dehumidifiers can ensure a dryer home by removing excess moisture, and they help alleviate the damage that excess humidity can cause. Comfort-Aire dehumidifiers offer style and efficiency in one package. And, they maintain the proper humidity level in your home or office which is important to your investment in furniture, wall panelling, tools — and your comfort.

European Styling complements both modern and traditional room settings. The sleek, modern cabinetry gives the dehumidifier a contemporary look and feel and is designed to look good in any room.

Casters allow the dehumidifier to be moved easily from one location to another.

HOW A DEHUMIDIFIER WORKS A fan pulls room air through cold evaporator coils which "wings" moisture from the air. This moisture then drips off the coils into the condensate container. The resulting "dried" air returns to the room.

ADJUSTABLE HUMIDISTAT Shuts dehumidifier off when selected dryness level is sensed. Provides dryness desired automatically with settings from OFF to DRIEST.

SOLID, QUIET OPERATION Featuring 2-speed fan control on the 40 and 50 pint models.

AUTOMATIC WATER LEVEL SHUT-OFF Shuts the dehumidifier off when condensate container is full. Helps minimize possibility of condensate container overflowing and causing damage to floors, carpets and furniture. A FULL indicator light on the front panel glows when the container is full and the dehumidifier has been turned off automatically. Standard on all models.

FULL WARRANTY Comfort-Aire electric dehumidifiers (all DH-Series) are covered by a 1-year full warranty on parts and labour. In addition, the sealed refrigeration system (including compressor, evaporator, condenser, drier-strainer and connecting tube) carries a 5-Year Full Warranty (parts and labour, 2nd-5th year).
