

HEAT CONTROLLER, INC.

HYDRONIC AIR HANDLERS

Matched to 13 & 14 SEER R-410A Air Conditioning Condensers

Blower Time Delay (30-45 Seconds)
Warms the coil before the blower is energized to prevent cold air release

Line Voltage Terminal Block and Low Voltage Terminal Strip
Allows fast, simple thermostat connection

High Temp Nylon Drain Pans
Resists corrosion and bacterial growth

Slide-Out Blower Assembly
Makes service and maintenance fast

Factory Installed Air Filter
Available in standard sizes

Freeze Protection for Both Heating and Cooling
Protects the entire system year 'round

3/4" Water Connections
Assures correct water supply lines

Multi-Position—Vertical, Horizontal left or right, and Downflow (with downflow conversion kit)

AHG SERIES FOR R-410A

1 1/2 to 5 TONS

CABINET FEATURES

- Entire cabinet is pre-painted, galvanized steel for maximum corrosion protection
- Interlocking access panels and gasketed screws eliminate air leakage

EVAPORATOR COIL

- Aluminum fin/copper tube, TXV for R-410A included
- Primary and secondary drains
- Five year limited warranty on coil

HYDRONIC COIL

- Built-in coil design
- Aluminum fin/copper tube construction
- Manual air vent and drain valves
- 3/4" sweat water connections

ELECTRIC SUPPLY

- 115V, 60 Hz system, 24 volt control circuit
- Low voltage terminal strip
- High voltage supply at top of cabinet
- Post-purge timer for cooling

AHG Series Hydronic Air Handlers—1½ to 5 Tons

The AHG family of highly efficient Hydronic Air Handlers offers the most-wanted features in the industry:

- Low voltage terminal strip and 24 volt transformer included for easy wiring
- Blower time delay of 30 to 45 seconds preheats the hydronic coil
- Freeze protection both heat and cool modes provides the ultimate in protection for the entire system
- Slide-out blower assembly makes service and maintenance fast and easy
- Multi-position design can be installed vertically, horizontally left or right, or in a downflow configuration (with a conversion kit)
- ARI matched with Heat Controller's line of 13 and 14 SEER condensing units for R-410A

Heat Controller has been in the business of keeping homes comfortable in all seasons since 1933. We offer a full line of energy efficient, quality constructed products including furnaces, heat pumps, air conditioners, dehumidifiers, ductless mini-split systems, and systems designed specially for geothermal installations. Our commercial/industrial line provides comfort solutions with capacities up to 25 tons. Each of the products in our line is backed by outstanding warranty coverage and after-sales support.

Your contractor or local dealer can help you select the equipment that is best suited to your needs and lifestyle.

...And for the best in year 'round comfort, AHG air handlers are ideally matched with our 13 and 14 SEER condensing units for R-410A, available in a wide range of sizes and featuring the industry's best limited warranty—12 years on the compressor and 12 years on parts.

(With registration by original owner within 90 days of purchase and installed as part of an ARI matched system; other limitations apply. See printed limited warranty for details.)

The AHG Series of high efficiency air handlers comes charged with R-410A, an environmentally friendly refrigerant. Refrigerants used in the past contained chlorine which, when released to the atmosphere, combined with oxygen molecules from the earth's vital ozone layer, destroying this barrier that protects us from the sun's harmful ultraviolet rays. Soon all CFC and HCFC refrigerants used around the world will be replaced by non-ozone depleting types such as the R-410A already in use in our equipment.
